Overview of 26 Prompt Principles (Source: Github)

As summarized by ChatGPT:

1. Directness: Avoid polite phrases and get straight to the point.
2. Audience Integration: Tailor the prompt considering the audience's background.
3. Sequential Simplicity: Break down complex tasks into simpler, interactive steps.
4. Affirmative Directives: Use positive directives like "do" rather than negative language.
5. Clarity Seeking: Use prompts that seek simple explanations or tailor them to the understanding level of specific audiences.
6. Incentive Mentioning: Include potential incentives for better solutions.
7. Example-Driven Prompting: Use examples to guide the LLM's responses.
8. Structured Formatting: Start prompts with "###Instruction###", followed by relevant examples or questions.
9. Directive Phrasing: Use phrases like "Your task is" and "You MUST" for clarity.
10. Penalty Indication: Mention potential penalties for non-compliance.
11. Natural Response Request: Ask for responses in a natural, human-like manner.
12. Step-by-Step Guidance: Use leading words to guide thought processes.
13. Unbiased Answer Requirement: Prompt for unbiased responses.
14. Interactive Detailing: Allow the model to ask questions for clarity.
15. Learning with Testing: Request teaching on a topic with a subsequent test.
16. Role Assignment: Assign a specific role to the LLM.
17. Use of Delimiters: Use specific formatting for clarity.
18. Repetition: Repeat specific words or phrases for emphasis.
19. Chain-of-Thought Combination: Combine direct instructions with examples.
20. Output Priming: Conclude prompts with the start of the desired response.
21. Detailed Writing Request: Ask for detailed texts on specific topics.
22. Style Preservation in Corrections: Improve grammar and vocabulary without changing the writing style.
23. Complex Coding Structure: Request scripts for complex coding tasks involving multiple files.
24. Continuation Prompts: Provide a starting point and request the LLM to continue the text.
25. Clear Requirement Stating: Clearly state essential elements or keywords to be included.
26. Sample-Based Writing: Request content similar to a provided sample.
